

ELECTRONIC LOCKBOX

A real estate professional understands that your home is likely your most valuable asset. Participating with an organized Multiple Listing Service provides the most opportunities for the right buyer to quickly find your home. Both real estate agents and your MLS recommend using an electronic KeyBox system from Supra. Why an electronic keybox?

For the agent:

A KeyBox on the property eliminates the need to drive all over town picking up and returning listing keys. This in turn means more showings that result in quicker sales.

The KeyBox captures information of who's entered a listing. Knowing and having access to this information can help an agent better position a property to sell.

For the homeowner:

A KeyBox on the property tracks agent entries and provides a reliable system for security during the real estate selling process. A home is typically the single largest investment a person will make during their lifetime. Why would anyone trust the security of their home, the contents and the occupants with a mechanical lockbox? An electronic lockbox helps keep folks accountable. A KeyBox provides access thereby resulting in a quicker sale.
